

# TOGETHER INTO THE FUTURE

# LESS TRASH MORE THRASH

## WASTE SEPARATION MADE EASY – PRE-PACKED THRASHER PACKAGES

To make it easier for you to separate your garbage, pre-prepared packages filled with yellow and black garbage bags will be handed out at the entrance gates to the festival site. The 40,000 ThrASHER bags were packed by Lebenshilfe Ansbach e.V. at the workshop in Feuchtwangen. The paper bags were produced right next door at the paper goods factory VP Group.

## STRONG DISPOSAL TEAM – OUR THRASHER TEAM

During the festival, our Thrasher team consists of over 40 people and cleans the entire festival area of over 120 hectares. Afterwards, the waste separated by you will be disposed of in the containers provided backstage.

## BIODEGRADABLE DISPOSABLE TABLEWARE

Our food stands must use biodegradable disposable tableware at their stands. The food retailers were allowed to choose the right tableware from a selection of predetermined product ranges.

We will check compliance with this requirement on site.

## DISPOSAL CONCEPT FOR FOOD STANDS AT THE SUMMER BREEZE

Our food stands are also included in the disposal process. To ensure fair disposal, we not only sort recyclables, residual waste and paper, but also food waste and used glass (a rare exception to the glass ban).

## NUMEROUS GARBAGE STATIONS ON THE FESTIVAL GROUND

At almost 50 waste stations and at all SHIT 'N' SHOWER STATIONS you will have the opportunity to separate your waste into residual waste, paper and yellow bags. We are counting on you to take advantage of the short distances and keep your camps and the site clean. In addition, yellow and black garbage bags will be handed out at all SHIT 'N' SHOWER STATIONS.

Our waste stations are emptied daily by our ThrASHER teams and sorted accordingly at the recycling station.

## ASHTRAYS FOR FENCES

For the first time this year, individually designed ashtrays will be installed along the construction fences on the way from the campground to the infield. The goal is to encourage a more conscious disposal of cigarette waste while also helping to keep the festival grounds clean.

## DEPOSIT STATIONS AT ALL SHIT 'N' SHOWER STATIONS

Last year, our pledge team Crowdpfanding was able to

collect EUR 60,000 in donations with just your help. To make this easier, this year there is an extra category for pledges for all SHIT 'N' SHOWER STATIONS.

## FOODSHARING STAND

Stop by the food sharing stand and help to throw away as little food as possible!

At this stand you can hand in food, swap food or simply take other food that has been handed in. The diligently collected and leftover food will be donated after the festival.

## DEALING WITH WATER AROUND THE SUMMER BREEZE

Reduced water consumption thanks to vacuum flush toilets, sewer-friendly composition of sanitary fluids in our portable toilets. Only reduced use of chemicals allows waste water to be fed into the regional systems.

## GOLDEIMER

This year, GOLDEIMER will be on site for the first time with composting toilets.

These resource-saving sanitary solutions help conserve water and promote a more conscious approach to environmental sustainability at the festival.

## LAPEES

Open, specially designed urinal stations for women and people who urinate in a squatting position. The pink units allow multiple people to use them at the same time and significantly reduce waiting times at sanitary facilities.

The Lapees are part of the new infrastructure and are installed at central points within the Shit n Shower station areas.

## OUR PROTECTION CONCEPT

Beyond the scenes, our crew also implements the manners that we want to see in front of the stages and on the campsite.

In order to ensure peaceful coexistence, a preventive protection concept has been drawn up for all crew members, service providers and other employees. From the organizer's point of view, the code of conduct is set out here and we call on crew members to adhere to it.

## AWARENESS TENT

We want to create a festival where nobody has to feel uncomfortable, threatened, or discriminated against. For this reason, the Awareness Tent is available around the clock as a contact point.

Following its successful introduction last year, the Awareness Team will once again be independently organized by the SUMMER BREEZE team this year. The Awareness Crew consists of trained staff with a social work background, Malteser emergency personnel with psychosocial emergency care training (PSNV), and works in close cooperation with the security team. You can recognize the team by their black safety vests marked with "AWARENESS TEAM".

## METALITY

The Metality team supports festivalgoers with disabilities – helping them set up tents, settle into their camp, or even carry a crate of beer.

On departure day, the team also collects leftover camping gear and donates it to charitable causes. You'll find collection points at all shower camp areas.

## SERVICE FOR PEOPLE IN A WHEELCHAIR

Together with Sanitätshaus FEIX from Dinkelsbühl and Metality e.V. we will be offering a service for wheelchair users on the festival site. A wide range of services will be provided from wheelchair repairs to assistance with arrival and setting up the camp.

There are also barrier-free platforms for people with disabilities on all main stages.

## EASY ARRIVAL BY PUBLIC TRANSPORT

A comfortable journey to the SUMMER BREEZE site with Deutsche Bahn coupled with our shuttle service is possible without any problems. On site, travelers without a vehicle are provided with practical parking spaces directly behind the main entrance.

## CARELESS CAMPING

Dedicated camping areas for visitors arriving without a vehicle. Located directly behind the box office to avoid long walking distances, as well as in Green Camp 1

## GREEN CAMPING

The demand was loud – and we listened: The Green Camp area has been expanded this year and now offers even more space for everyone who wants to camp without generators and in a cleaner, more eco-conscious environment.

For the first time, there will also be a proper compost disposal option available in this area.

## GREEN GARDEN PIT

The Green Garden Pit is a new area within Green Camping creating space for exchange, inspiration, and shared commitment around sustainability topics.

In a relaxed atmosphere around 15 different organizations, projects, and initiatives will present themselves here.

## ROUNDTABLE – GREEN REGULARS' TABLE

The Green Festival Roundtable brings together people from the music and festival scene during the event itself.

The goal: to exchange ideas on the current challenges of sustainable event planning, learn from each other, and develop shared solutions.

This year, the project is supported by the Association for Pop Culture in Bavaria (VPBy).
