

TOGETHER INTO THE FUTURE

LESS TRASH MORE THRASH

WASTE SEPARATION MADE EASY - PRE-PACKED THRASHER PACKAGES

To make waste separation easier for you pre-packed bags filled with yellow and black garbage bags will be handed out at the entrance gates to the festival area. The 25.000 ThRASHER bags will be packed by Lebenshilfe Ansbach e.V. in the workshop in Feuchtwangen.

CAPABLE WASTE DISPOSAL TEAM - OUR THRASHER TEAM

During the festival our Thrasher Team consists of over 40 people and cleans the complete festival area of over 120 hectares.

Afterwards the garbage separated by you will be disposed of in designated containers in the backstage.

NUMEROUS GARBAGE STATIONS ON THE FESTIVAL GROUND

At nearly 50 garbage stations as well as at all SHIT ,N' SHOWER STATIONS you will have the possibility to hand in your garbage separated into residual waste, paper and yellow bag. We count on you to take advantage of the short distances and to keep your camps and the site clean. Also, yellow and black garbage bags will be handed out at all SHIT `N' SHOWER STATIONS. Our garbage stations will be emptied daily by our Thrasher teams and sorted accordingly at the recycling station.

DISPOSAL CONCEPT FOR FOOD STANDS AT THE SUMMER BREEZE

Our food stands will also be involved in the disposal process. To ensure fair disposal, we not only sort by recyclables, residual waste and paper, but also by food waste and used glass (a rare exception from the glass ban).

ALTERNATIVER DIESEL FUEL FOR OUR WHEEL LOADERS

We supply our wheel loaders with hydrogenated vegetable oil = HVO100. These vegetable oils are converted into hydrocarbons by catalytic reaction with hydrogen. With the help of HVO100, 90% CO² emission is saved compared to conventional diesel.

BIODEGRADABLE DISPOSABLE TABLEWARE

Our food stands are required to use biodegradable disposable tableware at their stands.

From a selection of specified product ranges, food vendors and distributors were allowed to independently choose the appropriate tableware. We will check the compliance with this new requirement on site.

FOODSHARING BOOTH

Stop by the foodsharing booth and help to throw away as little food as possible!

At this booth, you can drop off food, barter, or simply take other food that has been dropped off, depending on your mood. The diligently collected and leftover food will be donated after the festival.

COMPOSTING MACHINE IN THE BACKSTAGE FOR THE 2.000-STRONG CREW

For the first time, the backstage area of SUMMER BREEZE is making itself available as a test lab. With the help of a bio-converter, the volume of biodegradable waste from our crew catering could be long term reduced by up to 90%. With approximately 2.000 crew members, this is a great step forward.

The converter is provided by Papstar.

OUR CODE OF CONDUCT

Behind the scenes our crew also implements the manners that we want to see in front of the stages and on the campsite.

In order to ensure a peaceful coexistence, a preventive protection concept for all crew members as well as service providers and other employees was created.

From the organizer's point of view, the code of conduct is stated here and we call upon all crew members to adhere to it.

AWARENESS TENT FOR ALL VISITORS

We want a festival where nobody has to feel uncomfortable, attacked or discriminated.

For this purpose the Awareness Tent is available 24/7h as a contact point. Please have a look at our festival ABC (festival 101).

COOPERATION WITH NACHTSAM

The organisation 'nachtsam' supports our festival and especially the SUMMER BREEZE Awareness Team in learning new things in dealing with our festival guests with the help of workshops and explicitly selected trainings.

EASY(R) ARRIVAL BY PUBLIC TRANSPORT

A comfortable journey with the Deutsche Bahn combined with our shuttle service to the SUMMER BREEZE area is possible without any problems. On site, travelers without a vehicle will be provided with convenient spaces directly behind the main entrance.

HOW WE HANDLE WATER AROUND SUMMER BREEZE

Reduced water consumption through vacuum flush toilets

Sewage friendly composition of sanitary liquids in our mobile toilets. Only reduced use of „chemicals“ allows wastewater to be fed into regional systems.

SERVICE FOR PEOPLE IN WHEELCHAIRS

For the first time we will be able to offer a service for wheelchair users on the festival grounds through the medical supply store FEIX in Dinkelsbühl. (Inflate, change tires, charge e-chairs/e-drives and minor repairs).
