

TOGETHER INTO THE FUTURE

LESS TRASH MORE THRASH

WASTE SEPARATION MADE EASY - PRE-PACKED THRASHER PACKAGES

To make it easier for you to separate your garbage, pre-prepared packages filled with yellow and black garbage bags will be handed out at the entrance gates to the festival site. The 40,000 Thrasher bags were packed by Lebenshilfe Ansbach e.V. in the workshop in Feuchtwangen.

NUMEROUS GARBAGE STATIONS ON THE FESTIVAL GROUND

At almost 50 waste stations and at all SHIT ,N' SHOWER STATIONS you will have the opportunity to separate your waste into residual waste, paper and yellow bags. We are counting on you to take advantage of the short distances and keep your camps and the site clean. In addition, yellow and black garbage bags will be handed out at all SHIT ,N' SHOWER STATIONS.

Our waste stations are emptied daily by our Thrasher teams and sorted accordingly at the recycling station.

STRONG DISPOSAL TEAM

- OUR THRASHER TEAM

During the festival, our Thrasher team consists of over 40 people and cleans the entire festival area of over 120 hectares. Afterwards, the waste separated by you will be disposed of in the containers provided backstage.

DEPOSIT STATIONS AT ALL SHIT N' SHOWER STATIONS

Last year, our pledge team Crowd... was able to collect EUR 60,000 in donations with just your help. To make this easier, this year there is an extra category for pledges for all SHIT ,N' SHOWER STATIONS.

FOODSHARING STAND

Stop by the food sharing stand and throw away as little food as possible!

At this stand you can hand in food, swap food or simply take other food that has been handed in. The diligently collected and leftover food will be donated after the festival.

DISPOSAL CONCEPT FOR FOOD STANDS AT THE SUMMER BREEZE

Our food stands are also included in the disposal process. To ensure fair disposal, we not only sort recyclables, residual waste and paper, but also food waste and used glass (a rare exception to the glass ban).

BIODEGRADABLE DISPOSABLE TABLEWARE

Our food stands must use biodegradable disposable tableware at their stands. The food retailers were allowed to choose the right tableware from a selection of predetermined product ranges.

We will check compliance with this requirement on site.

DEALING WITH WATER AROUND THE SUMMER BREEZE

Reduced water consumption thanks to minimum flush toilets, sewer-friendly combination of sanitary fluids in our portable toilets. Only reduced use of chemicals allows waste water to be fed into the regional systems.

OUR PROTECTION CONCEPT

Behind the scenes, our crew also implements the manners that we want to see in front of the stages and on the campsite.

In order to ensure peaceful coexistence, a preventive protection concept has been drawn up for all crew members, service providers and other employees. From the organizer's point of view, the code of conduct is set out here and we call on crew members to adhere to it.

AWARENESS TENT OR ALL VISITORS

We want a festival where nobody has to feel uncomfortable, attacked or discriminated against. The awareness tent is available around the clock as a contact point for this. Please take a look at our ABC POINT. This year, the awareness team will be represented by Act Aware for the first time. You can recognize the team by the black high-visibility vests with the imprint „AWARENESS TEAM“.

ADVICE FROM EXPERTS

The SUMMER BREEZE is checked for sustainability aspects by experts and then reviewed.

CARLESS CAMPING

Special camping area reserved for those arriving without a vehicle. Directly behind the box office to avoid long distances.

EASY ARRIVAL BY PUBLIC TRANSPORT

A comfortable journey to the SUMMER BREEZE site with Deutsche Bahn coupled with our shuttle service is possible without any problems. On site, travelers without a vehicle are provided with practical parking spaces directly behind the main entrance.

SERVICE FOR PEOPLE IN A WHEELCHAIR

Together with the medical supply store FEIX from Dinkelsbühl to provide a service for wheelchair users on the festival grounds offer: Inflating and replacing tires, charging e-chairs or e-drives and minor repairs). There are barrier-free platforms for wheelchair users or people with walking disabilities on all main stages.

ALTERNATIVE DIESEL FUEL FOR OUR WHEEL LOADERS

We supply our wheel loaders with hydrogenated vegetable oil = HVO100. These vegetable oils are converted into hydrocarbons through a catalytic reaction with hydrogen. 90% CO₂ emissions are saved compared to conventional diesel with the help of HVO100.
